EDUCATION

University of Illinois Urbana-Champaign — Urbana-Champaign, IL
Bachelor of Science — Expected May 2028
Major in Computer Engineering
Relevant Coursework: Computer Systems & Programming, Digital Systems Laboratory, Data Structures and Algorithms

WORK EXPERIENCE

CCC Intelligent Solutions — Chicago, IL
AI Engineering Intern — May 2026 - Aug 2026

- Built and deployed a multimodal AI pipeline combining computer vision models and LLM-powered tool orchestration to assess vehicle damage, generate structured diagnostic reports, and improve diagnostic accuracy by 18% on internal benchmarks.
- Built a production-grade agent evaluation framework and test harness, introducing standardized metrics for task grounding, latency, and reasoning quality that improved execution reliability and reduced model output drift by 35%.
- Integrated end-to-end telemetry and execution tracing across multi-agent loops using open-source observability tools, capturing reasoning trajectories to isolate production bottlenecks and improve system uptime.

Lossdog — Chicago, IL
Software Engineering Intern — Jan 2026 - May 2026

- Developed a full-stack admin application using PostgreSQL, Go, and React Admin, automating data management workflows for 12 internal users.
- Developed a multi-agent portfolio analysis system using LangGraph, integrating LLMs with deterministic code via Model Context Protocol (MCP) to enable reliable risk assessment and asset allocation.
- Built a cryptocurrency quote distribution system using NATS, processing 1,000+ quotes per second with sub-50ms latency for real-time trading dashboards.

Crédit Agricole Corporate and Investment Bank (CACIB) — Hong Kong
Robotic Process Automation (RPA) Intern — July 2021 - Sep 2021

- Built automated OCR extraction and web scraping tools in Python/MySQL to process 100+ documents and market data feeds.

RESEARCH & TECHNICAL EXPERIENCE

Neurify at NeurotechX UIUC — Champaign, IL (Remote)
Machine Learning Researcher — Sep 2025 - Present

- Developed 3 supervised learning models to classify cognitive states from BCI EEG data streams.
- Integrated real-time mental state classifications with the Spotify Web API using Python and Spotipy for adaptive audio playback.

Illini Electric Motorsports — Champaign, IL
Circuit Design Team Member — Oct 2024 - Sep 2025

- Designed 5 high/low voltage circuits for Formula SAE Electric vehicles, conducting SPICE simulations and cross-team integration to ensure Formula SAE compliance.

PROJECTS

16-bit SLC-3 Processor on FPGA

- Designed and implemented a 16-bit SLC-3 processor in SystemVerilog using Xilinx Vivado, integrating an ALU, register file, datapath and FSM-based control unit for instruction execution.
- Deployed and tested the processor on a Xilinx Spartan-7 FPGA, integrating memory and peripheral interfaces while debugging instruction execution, control signals and hardware I/O.

ADDITIONAL

Languages: Python, C++, C, Go, TypeScript, SQL, SystemVerilog, Assembly
Frameworks & Tools: React, PostgreSQL, LangGraph, Xilinx Vivado, Altium Designer, NATS, Git
