Kian Karbassian

Champaign, IL| (217) 766-9918 | kkarbassian@gmail.com | linkedin.com/in/kiankarbassian

EDUCATION

University of Illinois Urbana-Champaign — Urbana-Champaign, IL
Bachelor of Science — Expected May 2028
Major in Computer Engineering
Relevant Coursework: Computer Systems & Programming, Applied Parallel Programming, Digital Signal Processing

WORK EXPERIENCE

CCC Intelligent Solutions — Chicago, IL
AI Engineering Intern — May 2026 – Present

- Architected and productionized a multimodal AI pipeline for vehicle damage assessment, integrating computer vision models with LLM-powered tool orchestration to generate structured diagnostic reports and improve diagnostic accuracy by 18% on internal evaluation benchmarks.
- Built a production-grade agent evaluation framework and test harness, introducing standardized metrics for task grounding, latency, and reasoning quality that improved execution reliability and reduced model output drift by 35%.
- Integrated end-to-end telemetry and execution tracing across multi-agent loops using open-source observability tools, capturing reasoning trajectories to isolate production bottlenecks and improve system uptime.

Lossdog — Chicago, IL
Software Engineering Intern — Jan 2026 – May 2026

- Engineered full-stack admin application using PostgreSQL, Go, and React Admin, reducing manual data management tasks for 12 internal users through automated workflows.
- Developed a multi-agent portfolio analysis system using LangGraph, integrating LLMs with deterministic code via Model Context Protocol (MCP) to enable reliable risk assessment and asset allocation.
- Built a cryptocurrency quote distribution system using NATS, processing 1,000+ quotes per second with sub-50ms latency for real-time trading dashboards.

Crédit Agricole Corporate and Investment Bank (CACIB) — Hong Kong
Robotic Process Automation (RPA) Intern — July 2021 – Sept 2021

- Built automated OCR extraction and web scraping tools in Python/MySQL to process 100+ documents and market data feeds.

RESEARCH & TECHNICAL EXPERIENCE

Neurify Researcher — Champaign, IL (Remote)
NeurotechX UIUC — Sept 2025 - Present

- Developed 3 supervised learning models to classify cognitive states from BCI EEG data streams.
- Integrated real-time mental state classifications with the Spotify Web API using Python and Spotipy for adaptive audio playback.

Circuit Design Team Member — Champaign, IL
Illini Electric Motorsports — Oct 2024 - Sept 2025

- Designed 5 high/low voltage circuits for Formula SAE Electric vehicles, conducting spice simulations and cross-team integration to ensure Formula SAE compliance.

PROJECTS

Arduino Projects

- Developed 6 embedded systems projects in C/C++, including ultrasonic sensors and autonomous navigation prototypes.

ADDITIONAL

Technical Skills: Python, C++, Assembly, Altium Designer, Arduino, Golang, Typescript, Langgraph, PostgreSQL, React,
Awards: Harvard Book Prize, Duke of Edinburgh Silver Award, 2022, 2021 Climate Science Olympiad Semi-finalist
